We honor the illustrious career of Per Pinstrup-Andersen, H.E. Babcock Professor of Food, Nutrition and Public Policy in the Division of Nutritional Sciences, the J. Thomas Clark Professor of Entrepreneurship, and Professor of Applied Economics in the Charles H. Dyson School of Applied Economics and Management, as he retires from Cornell University. In recognition of Per's contribution to research, training, and policy, a Festschrift is being sponsored by the Division of Nutritional Sciences to recognize not only his contributions to Cornell University, but his role in shaping and strengthening institutions such as the International Food Policy Research Institute, the Consultative Group on International Agricultural Research (CGIAR), the University of Copenhagen, and Wageningen University. The 2001 World Food Prize Laureate, Per advocates for the poor and the hungry around the world in his work. His publications number over 400 books, refereed journals, and chapters, including co-authoring Seeds of Contention (2000), published in five languages, and Food Policy for Developing Countries (2011). Per's colleagues, collaborators, students, and friends from Cornell and throughout the world will come to Cornell December 13-14 to pay tribute and to present papers in the areas of Food Systems, Health, and Nutrition; Agricultural Development and Research and Technology Policy; Globalization, Trade, and Poverty; and Political Economy of Food and Agricultural Policy—the substantive themes that represent the breadth of Per's work. In keeping with the purpose of a Festschrift, the papers will be published in a book that is being edited by David E. Sahn.
